

Handrailing

Handrailing and standards are used in every type of industry, for platforms, stairways, gangways, towers, danger zones and where protection is required.

Tubular Steel Handrailing

Finishes include self colour, painted, galvanised and plastic coated, but other special finishes can be supplied. Products include;

- Tubular Mild Steel
- Solid Forged Mild Steel
- GRP

Tubular Standards Range

Our tubular handrail standards offer;

- Cost Effective
- Lightweight solutions which meet all the necessary British Standards

Solid Forged Steel Handrailing

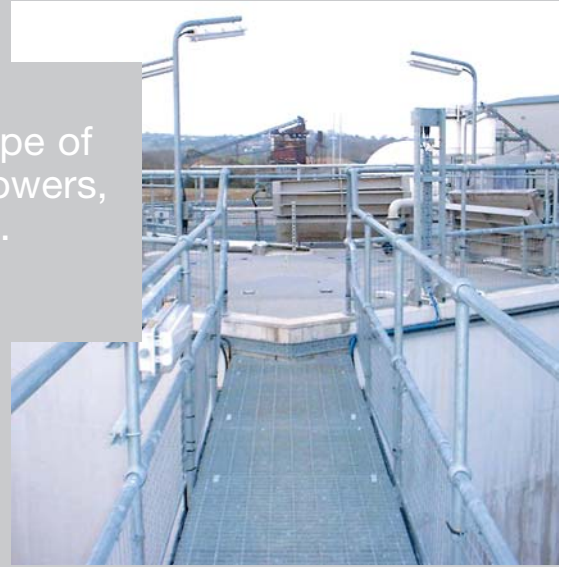

Our Solid forged handrail standards offer;

- One piece construction
- Heavy duty solution which meet all the necessary British Standards

GRP Handrails

Our GRP handrails offer a lightweight corrosion resistant system, manufactured to suit the loading requirements of;

- BS 6180 and BS EN ISO 14122, Side or base mounted systems can be supplied pieced small or in pre-fabricated frames for site installation.

Ladders

Access Design & Engineering offers a complete solution in various ladders and access requirements.

Benefits include;

- User Confidence
- Increased Safety
- Variety
- Installation
- Self Assembly
- Support

Ships Type

Access Design & Engineering offers a ships ladder used for access requiring a slope of at least 65° up to 75°. Ships type ladders offer a superior means of access over traditional cat ladders owing to the slope, allowing easier ascent and descent.

Cat Ladders

When vertical access is required, we can offer cat ladders to suit your requirements, offering you;

- Convenience
- Self Assembly
- Simplicity
- Economy
- Speed
