

Handrails, Ladders and Structures

structures

Handrails and Screens

GRP handrails offer a lightweight corrosion resistant system, manufactured to suit the loading requirements of:

- BS6180 and BS EN ISO 14122. Side or base mounted systems can be supplied pieced small or in pre-fabricated frames for site installation

Ladders

GRP Ladders are manufactured in accordance with the dimensional requirements of:

- BS4211 1994, Specification for ladders for permanent access to chimneys, other high structures, silos and bins
- BS5395 Part3 1985, 'Code of Practice for the design of industrial type stairs, permanent ladders and walkways'

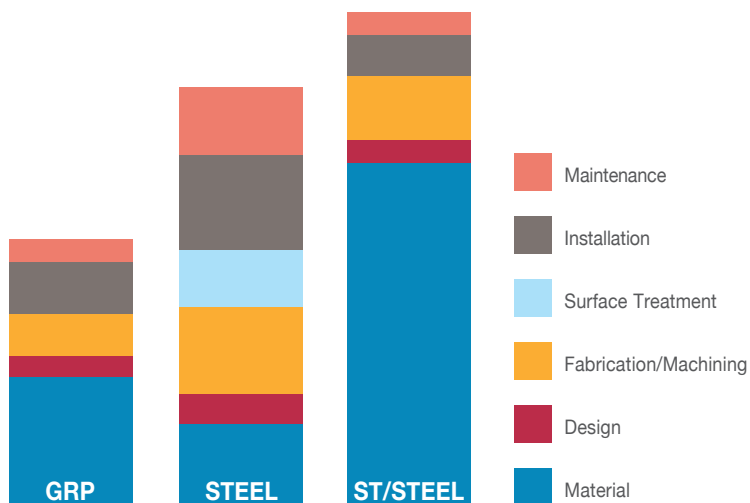

Structures

GRP structures are fabricated with profiles manufactured using the latest pultrusion process, offering lightweight and high strength GRP sections, providing a cost effective alternative to steel. (Up to 50% weight of equivalent steel structure.)

Drawings and structural calculations can be provided where required.

Comparative costs

Cutting and fabrication

Our extensive facilities ensure grating and structures can be cut and fabricated ready to install.

Site Installation

Access Design operates an ISO 9001-2000 quality system, for the design, manufacture and site installation of flooring, handrailing and structures manufactured in Steel or GRP.
